REPORT ON THE AUDIT OF THE FINANCIAL INFORMATION

Opinion

We have audited the financial information of the Funds, which comprise the statement of assets and liabilities as at 31 December 2020, and the statement of income and expenditure, and statement of changes in net asset value for the financial year then ended, and notes to the financial information, including a summary of significant accounting policies, as set out in pages 55 to 73.

In our opinion, the accompanying financial information of the Funds for the financial year ended 31 December 2020 are prepared, in all material respects, in accordance with the accounting policies set out in Note 2 to the financial information and the Guidelines on Investment-Linked Insurance/Takaful Business issued by Bank Negara Malaysia.

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the "Auditors' responsibilities for the audit of the financial information" section of our report. We are independent of the Funds in accordance with the ethical requirements that are relevant to our audit of the financial information in Malaysia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

REPORT ON THE AUDIT OF THE FINANCIAL INFORMATION (CONTINUED)

Emphasis of matters - basis of accounting and restriction on distribution and use

We draw attention to Note 2 to the financial information, which describes the basis of accounting. The financial information is prepared to assist the Funds to meet the requirements of the Guidelines on Investment-Linked Insurance/Takaful Business issued by Bank Negara Malaysia. As a result, the financial information may not be suitable for another purpose. Our report is intended solely for the certificate holders of the Funds as a body and should not be distributed to or used by parties other than the certificate holders of the Funds. Our opinion is not modified in respect of this matter.

Responsibilities of the Manager for the financial information

The Directors of Zurich Takaful Malaysia Berhad ("the Manager") are responsible for the preparation of the financial information in accordance with the accounting policies set out in Note 2 to the financial information and the Guidelines on Investment-Linked Insurance/Takaful Business issued by Bank Negara Malaysia, and for such internal control as the Manager determines is necessary to enable the preparation of financial information that are free from material misstatement, whether due to fraud or error.

In preparing the financial information, the Manager is responsible for assessing the Funds' ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the Manager either intend to liquidate the Funds or to cease operations, or have no realistic alternative but to do so.

The Manager is responsible for overseeing the Funds' financial reporting process.

REPORT ON THE AUDIT OF THE FINANCIAL INFORMATION (CONTINUED)

Auditors' responsibilities for the audit of the financial information

Our objectives are to obtain reasonable assurance about whether the financial information of the Funds as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial information.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

(a) Identify and assess the risks of material misstatement of the financial information of the Funds, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

REPORT ON THE AUDIT OF THE FINANCIAL INFORMATION (CONTINUED)

Auditors' responsibilities for the audit of the financial information (continued)

- (b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control.
- (c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager.
- (d) Conclude on the appropriateness of the Manager's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial information of the Funds or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Funds to cease to continue as a going concern.

Net Asset Value per unit	RM0.537
Net Asset Value of Fund	RM154,020,074

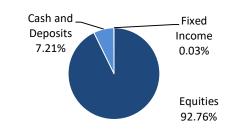

Market Review

The KLCI posted a second consecutive month of gains as investors continued to position into the Covid-19 recovery play in the market, following news of Covid -19 vaccine breakthroughs in November. On top of that, the Ministry of Health (MOH) announced that it has revised the quarantine period from two weeks to 10 days for all travellers and close contacts of COVID -19 positive patients. On the budget front, the opposition failed in its attempt to thwart Budget 2021 as it was passed in the final approval stage in the Dewan Rakyat today via an en bloc vote. The vote ended with 111 Members of Parliament (MPs) in favour and 108 MPs against the passing of the budget. Despite the downgrade in rating by Fitch from 'A -' to 'BBB+', Malaysian Ringgit and bond yield remained stable. To end the year 2020 on a positive note, the Ministry of Finance announced the extension of the vehicle sales tax exemption period, due to expire on 31 December, by a further six months until 30 June 2021.

PORTFOLIO STATEMENT

ZURICH TAKAFUL SHARIAH GROWTH FUND (CONTINUED)

Investment Outlook and Strategy

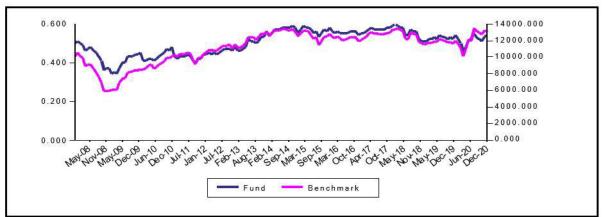

With major headwinds (US Presidential Election and Malaysia Budget 2021) are now being addressed and cheap valuations, we are now cautiously optimistic for 1H2021. Earlier hope for rapid recovery in 4Q2020 may be dented (due to resurgence of COVID-19 globally) but we are now confident of a sustainable economic recovery in 1H2021. As a result, we will continue with our high AA of 90-95% and focusing on post COVID-19 recovery theme. Sector in focus for will be on Financial Services, Consumer, Technology and Commodity-related (weakening of USD), whilst at the same time reducing our position on the Healthcare and REIT sectors .

PORTFOLIO STATEMENT

ZURICH TAKAFUL SHARIAH BALANCED FUND (CONTINUED)

Investment Outlook and Strategy (Continued)

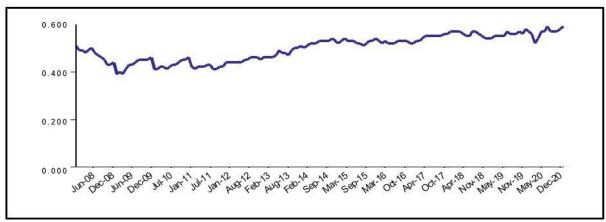

We carry on with our Q42020 strategy to take profit on Government Sukuk and move to Corporate Sukuk for better yield pick -up. With that said, we continue to be mindful in our credit selection with a preference on Issuers/Sectors which are more resilient with stronger fundamentals, as well as better liquidity. Any sell -off in the market is an opportunity to buy on dip as we continue to expect government Sukuk yields to remain range -bound but to be mindful that it is for trading purposes only.

Investment Objective

The Fund aims to provide a stable level of income.

Fund Data

As at 31 December 2020 Net Asset Value per unit Net Asset Value of Fund

RM0.871 RM38,706,155

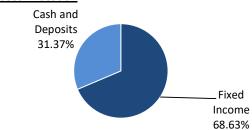

Market Review

Data released in December showed Malaysia's industrial production dropped 0.5% YoY in October-2020, swinging from September's +1.0% YoY increase and contracting for the first time in four months. October's downturn was largely attributed to a stronger decline in mining and quarrying output, largely due to the reimplementation of CMCO in most of the states since early October. Consumer Price Index continue to slipped for the 9th consecutive month in November-2020 to -1.7% YoY mainly attributed to the decrease in transportation (-11%) and utilities (-3%). Soft inflation continue to provide support for low bond yield which is crucial for 2021 economic recovery. Meanwhile, trade surplus in November-2020 surged to RM16.8bn as exports rose by 4.3% YoY, while import dropped by 9.3% YoY. The better export performance for the month was supported mainly by higher exports to US, Singapore, China and Hong Kong (electrical and electronic products).

ZURICH TAKAFUL MALAYSIA BERHAD

PORTFOLIO STATEMENT

ZURICH TAKAFUL SHARIAH INCOME FUND (CONTINUED)

Investment Outlook and Strategy

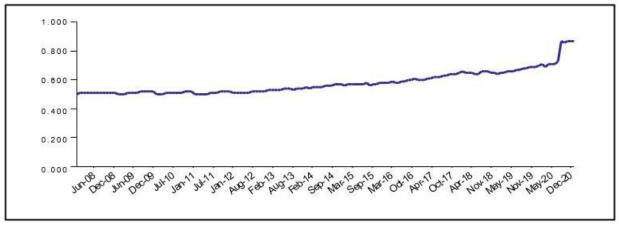

Despite with the revised 2021 Budget, the official fiscal deficit target from Ministry of Finance was unchanged at -5.4% for 2021. Based on our forecast, that should translate to around RM 160 billion of gross funding requirement. The 37 government bond and sukuk auctions in 2021 will see higher frequency of issuances in the 3year to 5-year bucket but we expect the actual amount supply to come in the 7-year to 10-year bucket in line with the government's bond and sukuk maturity profile. On a broader market theme, 2021 should continue to see foreign inflows into emerging market asset classes for yield pick -up. With most of the negative headlines already being priced in for Malaysia (i.e. high fiscal deficit, political uncertainties, rating downgrade), we could expect foreign investors to cautiously emerge as yields in major global economies remain significantly low. Bank Negara's decision to increase the r -opening auctions of existing Malaysian Government Securities in 2021 is expected to further improve secondary liquidity . FTSE Russell's review in March 2021 is another key event to shape the Malaysia yield curve . The portfolio continues to maintain its strategy to overweight corporate sukuks against sovereign sukuk for the additional yield pickup. Amid the current market backdrop, the portfolio remains mindful of adding risks by balancing between duration risks and credit risks.

Calendar Year Performance

	Annual Return
FY2020	26.42%
FY2019	7.49%
FY2018	-1.38%
FY2017	8.15%
FY2016	3.44%
FY2015	3.94%

PORTFOLIO STATEMENT

ZURICH TAKAFUL SHARIAH FLEXI FUND

Investment Objective

The Fund aims to generate potential capital appreciation over medium to long -term investment horizon given the flexibility of the asset allocation.

Fund Data

As at 31 December 2020	
Net Asset Value per unit	RM0.774
Net Asset Value of Fund	RM75 737 635

Market Review

Retail investors emerged as the largest net buyers in the Malaysian equity market as they looked for companies expected to benefit from the projected economic recovery in 2021F. Retailers raised their net bought position to RM 1.7bn worth of equities in December (vs. RM506m in November). This helped to absorb foreign selling of RM 596m (lower than the RM1bn net sell in November) and institutional selling of RM1.1bn in December. For the whole of 2020, the cumulative figure currently stands at RM 24.3bn, more than the 2018 and 2019 outflows combined.

On valuations, KLCI is currently trading at 2021 PE of 14.2x vs its 10-year mean of 15.4x. We expect the low interest rate environment to be sustained until the economy is on a firmer footing . With such a low interest rate, equity risk premium (ERP) has widened significantly to 4.22%, +2 SD over mean of 2.72%. This means that equity valuation is actually very cheap now relative to fixed income. We value KLCI at 1,730 for the base case for 2021 as we peg it to 17.1x PE . All things being consider, we are positive on Malaysia market from Valuations perspective .

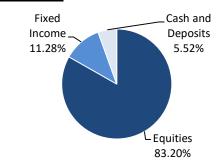

Investment Outlook and Strategy

The approval of 2021 Budget by the Parliament was the biggest short -term positive development that would help to alleviate political risk in Malaysia. Despite noises of a possible no confidence vote against the Prime Minister and the Budget 2021, it was passed and all measures will be implemented in 2021. With major headwinds (US Presidential Election and Malaysia Budget 2021) addressed and cheap valuations, we are now cautiously optimistic for 1H2021. Earlier hope for rapid recovery in 4Q2020 may be dented (due to resurgence of COVID-19 globally) but we are now confident of a sustainable economic recovery in 1H2021. As a result, we will continue with our high AA of 90-95% and focusing on post COVID-19 recovery theme. Sector in focus for will be on Financial Services, Consumer, Technology and Commodity-related (weakening of USD), whilst at the same time reducing our position on the Healthcare and REIT sectors .

Market Review

Malaysia specifically was a key standout within ASEAN markets, ending at +4.1% vs its other emerging counterparts which all closed in the red (Indonesia -5.5%, Philippines -3.6% and Thailand -9.2%). Foreigners net sold RM595mn worth of equities last month, bringing 2020 net outflow to RM24.6bn. Local institutions turned net sellers while retailers continue to be net buyers in December 2020: Retailers continued to account for 40.8% of trades in December 2020.

Market sentiment remains buoyant despite Fitch Ratings' downgraded Malaysia's long-term foreign currency issuer default rating to BBB+ from A+ with a stable outlook as U.S. authorized a Covid-19 vaccine developed by Pfizer for emergency use and news on the first shipments across the United States to inoculate more than 100 million people by the end of March 2021.

The local benchmark index climbed further to close at an 11-month high to 1,612.11 points, after Budget 2021 was approved by a majority voice vote in Parliament, boosting optimism over economic recovery. The two most contentious proposals relate to EPF withdrawals under i-Sinar (increased to RM10,000 from RM6,000) as well as on loan moratoriums. There were also more allocations given to the front-liners.

Investment Outlook and Strategy

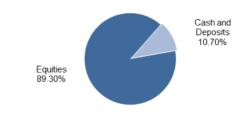

2020 will definitely be a year to remember for a long time. But despite the emergence of Covid-19 at the start of the year and much of the world spent their time under lockdowns, majority of markets still managed to record positive returns with some reaching double digits or record highs.

Investors are looking at beyond 1H2021 now and the expectations are the economy will recover strongly from 2H2021 due to the availability of vaccines which will result in more countries opening up their economy. The key themes for 2021 are the recovery in the economy and global trade. Hence, we expect cyclical sectors to benefit as the economy recovers. Also, we opined that ESG factors will be one of the important criteria in picking stocks as well.

PORTFOLIO STATEMENT

ZURICH TAKAFUL SHARIAH GROWTH 2 (CONTINUED)

Investment Outlook and Strategy (Continued)

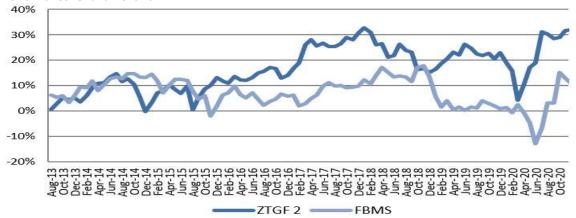

We foresee the return of global funds to Asian markets in 2021. Malaysia is expected to benefits but performance might be lagging relative to other market in the region due to political uncertainties. We do expect index to go higher as corporate earnings improve along with the gradual recovery in the economy and foreign inflows might back in Malaysia. Uncertainties are still prevailing due to the surging local Covid-19 that may force further lockdowns that would overshadow optimism over recent vaccine developments.

Market Review

Malaysia specifically was a key standout within ASEAN markets, ending at +4.1% vs its other emerging counterparts which all closed in the red (Indonesia -5.5%, Philippines -3.6% and Thailand -9.2%). Foreigners net sold RM595mn worth of equities last month, bringing 2020 net outflow to RM24.6bn. Local institutions turned net sellers while retailers continue to be net buyers in December 2020: Retailers continued to account for 40.8% of trades in December 2020.

Market sentiment remains buoyant despite Fitch Ratings' downgraded Malaysia's long-term foreign currency issuer default rating to BBB+ from A+ with a stable outlook as U.S. authorized a Covid-19 vaccine developed by Pfizer for emergency use and news on the first shipments across the United States to inoculate more than 100 million people by the end of March 2021.

The local benchmark index climbed further to close at an 11-month high to 1,612.11 points, after Budget 2021 was approved by a majority voice vote in Parliament, boosting optimism over economic recovery. The two most contentious proposals relate to EPF withdrawals under i-Sinar (increased to RM10,000 from RM6,000) as well as on loan moratoriums. There were also more allocations given to the front-liners.

Investment Outlook and Strategy

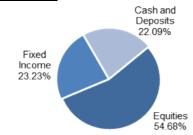

2020 will definitely be a year to remember for a long time. But despite the emergence of Covid-19 at the start of the year and much of the world spent their time under lockdowns, majority of markets still managed to record positive returns with some reaching double digits or record highs.

Investors are looking at beyond 1H2021 now and the expectations are the economy will recover strongly from 2H2021 due to the availability of vaccines which will result in more countries opening up their economy. The key themes for 2021 are the recovery in the economy and global trade. Hence, we expect cyclical sectors to benefit as the economy recovers. Also, we opined that ESG factors will be one of the important criteria in picking stocks as well.

PORTFOLIO STATEMENT

ZURICH TAKAFUL SHARIAH BALANCED 2 (CONTINUED)

Investment Outlook and Strategy (Continued)

We foresee the return of global funds to Asian markets in 2021. Malaysia is expected to benefits but performance might be lagging relative to other market in the region due to political uncertainties. We do expect index to go higher as corporate earnings improve along with the gradual recovery in the economy and foreign inflows might back in Malaysia. Uncertainties are still prevailing due to the surging local Covid-19 that may force further lockdowns that would overshadow optimism over recent vaccine developments.

Market Review

Malaysia Government Securities ("MGS") and Government Investment Issues ("GII") curve were generally softer with yields seen to be drifted higher on less trading activities towards the end of the year as well as improvement in risk appetite following vaccine progress that saw global yields spiked and reversed entirely. The uncertainties ahead of the Budget 2021 debate and passing vote added in pressuring sentiment of Malaysia's bond market during the month. At this juncture, high anticipation in bond market is unlikely given the improvement in risk appetite might flows into equities following vaccine progress that could enhance optimism over combating and containing the rising global Covid-19 cases and help on global economy growth. Rising external yields will inevitably weigh on Ringgit bonds when supply profile remains heavy while demand faces headwinds. Nevertheless, BNM has ample capacity to raise its exposure in local government bonds though may less motivated to do so if yield increase comes under the context of better growth prospects.

Month-on-month, both MGS and GII space were bear-steepened with the front-end yields adjusted higher after the rate cut expectation did not materialize. At month end, the MGS 3-, 5-, 7-, 10-, 15-, 20- and 30-year MGS closed the month at 1.75% (Oct-2020: 1.75%), 2.00% (2.00%), 2.32% (2.32%), 2.61% (2.61%), 3.10% (3.10%), 3.45% (3.45%) and 3.89% (3.89%) respectively. Similarly, the GII 3-, 5-, 7-, 10-, 15-, 20- and 30-year GII were reported at 1.79% (Oct-2020: 1.79%), 1.96% (1.96%), 2.34% (2.34%), 2.59% (2.59%), 3.21% (3.21%), 3.51% (3.51%) and 4.00% (4.00%) respectively.

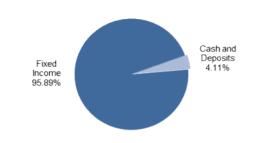

Investment Outlook and Strategy

We expect market to be more cautious in the coming months and into 2021 premised on higher supply in both government and corporate issuance as well as heightened policy and political uncertainty domestically. Additionally, vaccines and US political landscape may reshape global growth and inflation outlook in the next few months with rising external yields will also weigh on local bond sentiments.

ZURICH TAKAFUL MALAYSIA BERHAD

PORTFOLIO STATEMENT

ZURICH TAKAFUL SHARIAH GLOBAL EDGE FUND

Investment Objective

The Fund aims to provide capital growth over a longer term period by investing in an Exchanged Traded Funds (ETF) which tracks the investment results of the MSCI World Islamic Index (NIWO).

Fund Data

As at 31 December 2020 Net Asset Value per unit Net Asset Value of Fund

RM0.523 RM13,195,593

Market Review

The MSCI World Islamic Index continued to rise, up 3.2% in December as economic data maintained its positive uptrend and investors embraced the re-opening and recovery themes as more vaccines look set to be approved for use to fight the Covid-19pandemic that has crippled the global economy in 2020.

The European Central Bank (ECB) rolled out yet more stimulus measures to lift the currency bloc out of a double-dip recession and provide support to the economy.

The second wave of Covid-19 infections and lockdowns poses "a considerable risk" to the eurozone economy, the IMF has warned, adding that recent progress on vaccines will not deliver a recovery in the near future and further support from fiscal and monetary policy is needed.

Fund review

The Fund's unit NAV gained 3.0% in December, compared to +3.2% in the MSCI World Islamic Index. Stock selection was a detractor. The Fund was 89% invested in the BlackRock iShares MSCI World Islamic UCITS ETF as at end-December.

Investment Outlook and Strategy

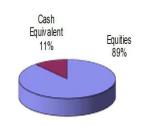

As we enter into a new decade, a synchronized global slowdown appears to be unavoidable after a two-year long US-China trade war. Prospects for global growth had been on a downtrend throughout most of 2019 and this had been reflected in deteriorating global manufacturing sentiment as well as weak global growth.

The International Monetary Fund (IMF) expects that the Covid-19 pandemic will cause a global recession in 2020 but it expects a recovery in 2021. Risks include a further escalation in the trade war between US and China or between the US and Europe and an escalation of political risks within the Eurozone. The onset of Covid-19 has added to the risk premia. Investors with a high risk appetite and a longer term view could adopt cost averaging and regular investment strategies to ride out the market volatility.

Future prospects and proposed strategies	fiscal deficit target from Ministry of Finance was unchanged at -5.4% for 2021. Based on our forecast, that should translate to around RM 160 billion of gross funding requirement. The 37 government bond and sukuk auctions in 2021 will see higher frequency of issuances in the 3-year to 5-year bucket but we expect the actual amount supply to come in the 7-year to 10-year bucket in line with the government's bond and sukuk maturity profile. On a broader market theme, 2021 should continue to see foreign inflows into emerging market asset classes for yield pick -up. With most of the negative headlines already being priced in for Malaysia (i.e. high fiscal deficit, political uncertainties, rating downgrade), we could expect foreign investors to cautiously emerge as yields in major global economies remain significantly low. Bank Negara's decision to increase the re -opening auctions of existing Malaysian Government Securities in 2021 is expected to further improve secondary liquidity. FTSE Russell's review in March 2021 is another key event to shape the Malaysia yield curve. The portfolio continues to maintain its strategy to overweight corporate sukuks	The approval of 2021 Budget by the Parliament was the biggest short -term positive development that would help to alleviate political risk in Malaysia. Despite noises of a possible no confidence vote against the Prime Minister and the Budget 2021, it was passed and all measures will be implemented in 2021. With major headwinds (US Presidential Election and Malaysia Budget 2021) addressed and cheap valuations, we are now cautiously optimistic for 1H2021. Earlier hope for rapid recovery in 4Q2020 may be dented (due to resurgence of COVID-19 globally) but we are now confident of a sustainable economic recovery in 1H2021. As a result, we will continue with our high AA of 90-95% and focusing on post COVID-19 recovery theme. Sector in focus for will be on Financial Services, Consumer, Technology and Commodity-related (weakening of USD), whilst at the same time reducing our position on the Healthcare and REIT sectors. Despite with the revised 2021 Budget, the official fiscal deficit target from Ministry of Finance was unchanged at -5.4% for 2021. Based on our forecast, that should translate to around RM 160 billion of gross funding requirement. The 37 government bond and sukuk auctions in 2021 will see higher frequency of issuances in the 3-year to 5-year bucket but we expect the actual amount supply to come in the 7-year to 10-year bucket in line with the government's bond and sukuk maturity profile. On a broader market theme, 2021 should continue to see foreign inflows into emerging market asset classes for yield pick -up.

The key theme dring for 2021 are the recovery in the economy and global traded recovers. Also, we opined that ESG factors will be one of the important criteria in picking stocks as well. We foresee the return of global funds to Asian markets it 2021. Malaysia is expected to benefits but performance might be lagging relative to other market in the region due to political uncertainties. We do expect index to go higher a corporate earnings improve along with the gradual recovery if the economy and foreign inflows might back in Malaysia Uncertainties are still prevailing due to the surging local Covity that may force further lockdowns that would overshadow optimism over recent vaccine developments.

Funds	Shariah Global Edge Fund						
Objective	The Fund aims to provide capital growth over a longer term period by investing in an Exchanged Traded Funds (ETF) which tracks the investment results of the MSCI World Islamic Index (NIWO).						
Asset allocation Net investment returns	Equities and Derivatives 89.05% Fixed Income Securities 0.00% Cash and Deposits 10.95% Year End 2020 35,690						
Description of charges levied	Wakalah Tharawat fee of 1% p.a						
Future prospects and proposed strategies	As we enter into a new decade, a synchronized global slowdown appears to be unavoidable after a two-year long US-China trade war. Prospects for global growth had been on a downtrend throughout most of 2019 and this had been reflected in deteriorating global manufacturing sentiment as well as weak global growth. The International Monetary Fund (IMF) expects that the Covid-19 pandemic will cause a global recession in 2020 but it expects a recovery in 2021. Risks include a further escalation in the trade war between US and China or between the US and Europe and an escalation of political risks within the Eurozone. The onset of Covid-19 has added to the risk premia Investors with a high risk appetite and a longer term view could adopt cost averaging and regular investment strategies to ride out the market volatility.						
Performance	Absolute target return 4.6% p.a						
of relevant benchmark indices	Year End 2020 6.50%

NOTES TO THE FINANCIAL INFORMATION - 31 DECEMBER 2020

1. PRINCIPAL ACTIVITIES AND GENERAL INFORMATION

The Zurich Takaful Investment-Linked Funds consist of the Zurich Takaful Shariah Growth Fund, Zurich Takaful Shariah Balanced Fund, Zurich Takaful Shariah Income Fund, Zurich Takaful Shariah Flexi Fund, Zurich Takaful Shariah Growth 2, Zurich Takaful Shariah Balanced 2, Zurich Takaful Shariah Income 2 and Zurich Takaful Shariah Flexi 2, Zurich Takaful Shariah Global Edge Fund (hereinafter referred to collectively as "the Funds"). The principal activities of the Funds are to invest in authorised investments.

The Manager of the Funds is Zurich Takaful Malaysia Berhad, a company incorporated in Malaysia, whose principal activity is conducting Family Takaful business, including investment-linked business.

The financial information were authorised for issued by the Board of Directors of the Manager in accordance with their resolution on 25 February 2021.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial information.

(a) Basis of accounting

The financial information of the Funds have been prepared under the historical cost convention, except as disclosed in the summary of significant accounting policies. The financial information have been prepared in accordance with the accounting policies described in Note 2 to the financial information and the Guidelines on Investment-Linked Insurance/Takaful Business issued by Bank Negara Malaysia. The preparation of the financial information requires the use of estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial information, and the reported amounts of income and expenses during the reported financial year. It also requires the Manager to exercise its judgement in the process of applying the Company's accounting policies. Although these estimates are based on the Manager's best knowledge of current events and actions, actual results may differ from those estimates.

However, the Manager is of the opinion that there are currently no areas where assumptions and estimates that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year and no accounting policies which requires significant judgement to be exercised.

(b) Income recognition

Profit income on fixed and call deposits and unquoted investments, including the amount of amortisation of premiums and accretion of discounts, is recognised on a time proportion basis that takes into account the effective yield of the asset.

Dividend income is recognised when the right to receive payment is established.

Gains or losses arising from the disposal of investments are credited or charged to the statement of income and expenditure.

ZURICH TAKAFUL MALAYSIA BERHAD

ZURICH TAKAFUL INVESTMENT-LINKED FUNDS

NOTES TO THE FINANCIAL INFORMATION - 31 DECEMBER 2020 (CONTINUED)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(c) Investment management fees

Investment management fees are calculated based on the Net Asset Values of the Funds in accordance with the provisions of the investment-linked certificate document and are charged to the statement of income and expenditure when incurred.

(d) Taxation

Taxation on the statement of income and expenditure comprises current and deferred tax. Current tax is the expected amount of tax payable in respect of the taxable income for the financial year, using tax rate enacted or substantially enacted at the date of the statement of assets and liabilities, and any adjustment to tax payable in respect of previous financial years.

Deferred tax is recognised in full, using the liability method, on temporary differences arising between the amounts attributed to assets and liabilities for tax purpose and their carrying amounts in the financial information. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which the deductible temporary differences or unused tax losses can be utilised. Deferred tax is determined using tax rate (and tax laws) enacted or substantively enacted by the date of the statement of assets and liabilities.

(e) Investments

Investment held by investment-linked funds are designated at fair value to income at inception as they are managed and evaluated on a fair value basis, in accordance with the respective investment strategy and mandate. These investments are initially recorded at fair value and transaction costs are expensed in statement of income and expenditure. Subsequent to the initial recognition, these assets are remeasured at fair value. Fair value adjustments are recognised in the statement of income and expenditure.

(f) Net creation of units

Net creation of units represents contributions paid by participants as payment for a new contract or subsequent payments to increase the amount of that contract less switching within funds. Net creation of units is recognised on a receipt basis.

(g) Net cancellation of units

Net cancellation of units represents cancellation of units arising from surrenders and withdrawals. Cancellation is recognised upon surrendering of the related takaful contract.

(h) Cash and cash equivalents

Cash and cash equivalents consist of cash and bank balances, excluding fixed and call deposits, that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

(i) Financial instruments

Description

A financial instrument is any contract that gives rise to both a financial asset of one enterprise and a financial liability or equity instrument of another enterprise. A financial asset is any asset that is cash, a contractual right to receive cash or another financial asset from another enterprise, a contractual right to exchange financial instruments with another enterprise under conditions that are potentially favourable, or an equity instrument of another enterprise. A financial liability is any liability that is a contractual obligation to deliver cash or another financial asset to another enterprise, or to exchange financial instruments with another enterprise under conditions that are potentially unfavourable. The particular recognition method adopted for financial instruments recognised on the statement of assets and liabilities is disclosed in the individual accounting policy note associated with each item.

Fair Values

The Funds' basis of estimation of fair values for financial instruments is as follows:

- The fair values of quoted investments are based on market prices
- The fair values of unquoted corporate debt securities are based on the prices quoted by financial institutions
- The fair values of other financial assets and liabilities with a maturity period of less than one year are assumed to approximate their carrying values.

The carrying amount of the financial assets and liabilities of the Funds at the statement of assets and liabilities date approximate their fair values.

(j) Receivables and payables

Receivables are recognised when due and measured on initial recognition at the fair value of consideration received or receivables. Subsequent to initial recognition, receivables are measured at amortised cost, using the effective yield method. If there is objective evidence that the receivable is impaired, the Funds reduce the carrying amount of the receivable accordingly and recognise the impairment loss in the statement of income and expenditure.

Payables are recognised when due and measured on initial recognition at the fair value of consideration received. Subsequent to initial recognition, payables are measured at amortised cost using the effective yield method.
